

## ECOCYL<sup>®</sup>. Disposable Cylinder and Lecture Bottle Replacement. Environmentally Responsible. Economically Attractive.

Using the shoulder strap, the ECOCYL<sup>®</sup> is easy to carry on long, fixed-sensor calibration tours

### ECOCYL<sup>®</sup> R and V Series

Linde's ECOCYL<sup>®</sup> R and V series cylinders are direct replacements for disposable cylinders and lecture bottles.

- R Series:
  - Aluminum cylinder for non-liquefied gases and mixtures
  - Built-in regulator and multi-setting flowmeter
- V Series:
  - Steel cylinder for liquefied gases
  - Built-in manual flow control valve

### Innovative Design

This advanced design significantly improves cylinder handling and storage safety.

- Cowling protects valve from damaging falls or impacts and prevents rolling
- Tethered gas-tight outlet cap on V series
- Ergonomic carrying handle is an integral feature of the cowling
- Integrated valve stabilizes cylinder and prevents tipping

### Precision Flow Control

ECOCYL<sup>®</sup> features precision flow control.

- Linde-supplied precision regulator/flowmeter or flow control valve is built into the cylinder valve
- Extremely consistent flow at very low flow rates
- Linde is responsible for valve and cylinder maintenance

### Versatility

You benefit from product packaging versatility.

- Liquefied and non-liquefied gases
- Toxic, flammable and corrosive gases
- Ideal size and capacity for Pharmaceutical and University research settings
- Universal hose barb connection accommodates most common hoses, other valve outlets available

**Economic Alternative**

Linde’s innovative, high-capacity ECOCYL® is an economically superior alternative to comparably-sized disposable cylinders.

- Completely refillable, conveniently returnable – no disposal costs can save over \$300 per disposable cylinder
- Contains up to 300% more product than most comparable disposable cylinders
- ECOCYL® yields significantly improved per litre economics
- Eliminates user-supplied regulator/flowmeters or flow control valves

**Environmentally Responsible**

ECOCYL® PCG is an environmentally responsible solution.

- Refillable empties are returned to Linde, no piles of lecture bottles and empty disposable cylinders

*ECOCYL® is a Linde Patented Product*

R Series

ECOCYL® eliminates lecture bottle disposal and hazardous waste issues.

V Series

**Always for high quality applications**

HiQ® stands for the best Linde has to offer in specialty gases, equipment and high quality services. In a highly complex and specialized business sector, our vision is simple: we provide precisely what our customers need, whenever and however they need it.
